## PROFILE

I'm a passionate full-stack developer based in Lào Cai, Vietnam. With a strong background in web development, Minh specializes in building efficient, maintainable, and user-friendly applications. He enjoys solving real-world problems with clean architecture and modern technologies like React, Node.js, and Go. Minh is also active in local developer communities, mentoring younger coders in northern Vietnam.

## EXPERIENCE

**FULL-STACK DEVELOPER – LÀO CAI DIGITAL TECH (LÀO CAI, VIETNAM)**  
2021 – PRESENT

- Led the development of a web platform for local tourism services and small businesses.
- Built backend APIs using Node.js and PostgreSQL, improving request performance by 45%.
- Collaborated with provincial IT departments to digitize administrative services.
- Trained interns from Tây Bắc University in modern web technologies.

**SOFTWARE ENGINEER – GREENFARM TECH (HANOI, VIETNAM) 2020 – 2021**

- Integrated real-time data collection and visualization for over 200+ sensors in rural farming areas.
- Created custom authentication middleware and improved API response time by 50%.

**JUNIOR WEB DEVELOPER – LÀO CAI IT SOLUTIONS (LÀO CAI, VIETNAM) 2018 – 2020**

- Built and maintained local business websites for tourism and education sectors.
- Implemented SEO improvements that increased client site traffic by 25%.
- Provided on-site technical training to small business owners on using CMS tools.
